

CFO asks the CEO: “What happens if we invest in the development of our people and then they leave our company?”

CEO’s answer: “What happens if we don’t invest and they stay?”

FILTRATION GROUP PRODUCT TRAININGS

Every year Filtration Group GmbH offers various product trainings for premium partners and customers. There, your employees will acquire competences around the wide world of filtration. Our product training courses are made up of various topic modules and guarantee practical relevance. The qualification of your employees is the guarantor for an effective operational sequence and increases the productivity of your enterprise. We offer tailor-made training courses for a wide range of requirements.

Please contact us for individual dates and in-house training.

- More efficient treatment processes for cooling lubricants

REASONS FOR YOUR VISIT

Oriented on the requirements of our customers - this is how the FG Expert Days and our training program are presented. Our practical forums see themselves as a highly specialized communication platform for personal exchange and form the basis for intensive discussions.

EVENT FRAMEWORK

The number of participants is limited! Please contact us in order to secure a place in the event of your choice. The training courses will be held in German or English (see note). The expert days will be held in German.

YOUR ADVANTAGES

- **Time & cost efficiency**
The familiar character of our event allows you to participate without high expenditure of time and money
- **Networking platform**
Detailed discussions in a pleasant atmosphere offer the opportunity to gather a lot of information and make contacts in a short time.
- **Competence bundling**
Parallel to our events there is a small in-house exhibition and you have the possibility to get an insight into our products and the laboratory area. Thus, competences are bundled at one event
