Dust filter cartridge 160 NK

Ø 160 mm, Type 852 054, 984 mm long

1. Features

The conical Filtration Group 852 054 dust filter cartridge unites optimum flow behaviour with excellent cleaning properties for even the most problematic dusts.

The wide range of high-quality media together with our long history of experience in air cleaning technology make Filtration Group a trustworthy partner for a multitude of applications.

In combination with the Filtration Group MJD cleaning unit (pressure cleaning with a multi-jet nozzle), this filter cartridge provides an efficient solution in exceptionally challenging environments.

Characteristics

- High volume flows
- Optimised flow conditions
- Excellent cleaning properties
- Worldwide distribution

* Version made of stainless steel V4A - 1.4571 or equivalent

** These values may vary depending on the nature of the dust and the composition of the gas.

4. Installation

The 852 054 dust filter cartridge can be mounted on and dismantled from the the filter plate using the Rd 100x4 mounting thread adapter - no tools required.

A hole with a diameter 108 mm must be drilled in the filter plate in order to mount the thread adapter. The mounting thread adapter should be spot-welded to the filter plate as shown in the drawing. The Rd 100x4 mounting thread adapter is available from Filtration Group in galvanized steel or stainless steel V4A - 1.4571.

6. Cleaning

We recommend cleaning the dust filter cartridge with the Filtration Group multi-jet nozzle. The optimised geometry of the multi-jet nozzle guarantees excellent cleaning results with a significantly lower noise level.

The multi-jet nozzle is available from Filtration Group in aluminium or stainless steel. It can also be puchased as part of the Filtration Group MJD cleaning unit, comprising the nozzle, a tripod and various small assembly components. The tripod maintains an optimum distance from the cartridge to ensure maximum cleaning efficiency.
