GREEN TECHNOLOGY

MAKE IT VISIBLE

BLUE TURNS GREEN

From 01st January 2021 we will change our product primer from blue to green.

Four years ago, MAHLE Industriefiltration became the Filtration Group Industrial. Our aim is to be visible and present for our customers and partners. This is not only lived in our daily work, but now also with our new product primer FG Green.

- Concerns all products that were previously blue primed
- Better recoatability of FG Green compared to the previous blue primer

Because together we are making the world...

safer

healthier

more
productive
