# QUALITY IS ESSENTIAL

When it comes to replacing cartridges in stationary and mobile hydraulic systems, you need quality that efficiently meets all requirements and positively impacts your bottom line at the same time. Filtration Group now offers a complete product line for safe and cost-effective cartridge replacement in hydraulics applications.

## YOUR BENEFITS

- Comprehensive line of cartridges for pressure filters and return-line filters from a single source - in a number of different designs and ratings
- Compatibility with many established manufacturers (cross-reference)
- Defined filter performance and cleanliness class
- Defined service life
- High level of functionality and safety
- Outstanding reliability and cost-effectiveness
- Certified quality
- Tested according DIN and ISO standards, with all prevalent industrial approvals

Our filters reduce solid contamination to the required contamination class, prevent ingress of extraneous dirt, and maintain the properties of the pressure fluid over the long term.

## SERVICE UND AVAILABILITY

Speed and high-quality service are critical factors for success in a competitive environment.

### WE ENSURE YOUR COMPETITIVE EDGE

- Customized warehousing based on your needs for fast delivery
- Individual product labeling according to your specifications
- A dedicated sales organization to take care of all your needs. You receive personal support from our regional field representatives.

## QUALITY THAT ADDS TO YOUR BOTTOM LINE:

### STAR-PLEATED CARTRIDGES FOR STATIONARY AND MOBILE HYDRAULICS

- For servicing and repair of hydraulic systems
- For distributors
- For operator

### INNOVATIVE SOLUTIONS PARTNER WITH SYSTEMS EXPERTISE

Filtration Group has been producing high-quality industrial filters for fluid technology, dust filtration, and process technology for many years. As an innovative, reliable development partner and supplier for the leading manufacturers of hydraulic systems and equipment all over the world, Filtration Group is your expert systems partner in all areas of pressure fluids filtration.

Intelligent logistics concept ensures fast availability of parts
